**Subject:** comments for Monisha

Hi Nikhil,

Your message is below. My response is **bolded**.

Hi Rebecca - I just talked with Monisha. She wanted me to respond to her email on chlorpyrifos about how much time we'd need for the two crops we could work on in the near future. I am going to suggest May 4 or 5 as a deadline. She also wanted me to tell her what (if any) other projects would have to get less attention and possibly slip (in terms of deadlines) if we pursue the chlorpyrifos work in earnest next week. Can you let me know what you think? I would like to send my email by about 4 pm today.

**Deadline of May 4 or 5 is fine with me. Should we ask Jonathan, though? He has the other piece (rates, rate distribution, lbs ai applied), and I don't know what his workload is like.**

## Ex. 5 Deliberative Process (DP)

**In conclusion, I really don't anticipate problems with ongoing projects as long as nothing too strange emerges for methomyl. Relatively few meetings are scheduled next week, which helps with progress on projects.**
